

FICTIONAL TRAINING DOCUMENT - NOT AN AIR CANADA RECORD

All people, events, figures, identifiers, locations and procedures below are invented.

Air Canada is used only as the setting for a software test. No real employee is described.

AIR CANADA SCENARIO: CONFIDENTIAL PERSONNEL REVIEW PACKET

Scenario reference: TEST-AC-HR-2026-001

Prepared: 2026-09-21

Intended audience: fictional HR reviewer and fictional employment counsel

Purpose: practice removing private personnel details while preserving useful program information.

1. PROGRAM INFORMATION INTENDED TO REMAIN READABLE

This fictional onboarding pilot evaluated whether shorter training sessions improved completion.

In this scenario, 52 employees participated and the aggregate completion rate was 94%.

The fictional pilot reduced administrative processing time by 18%.

The next program review is planned for October 2026.

This packet contains no real flight schedules, passenger records or operational security procedures.

External enquiries: training-demo@example.invalid

The external enquiries mailbox is a deliberately public, fictional contact for this exercise.

2. PRIMARY EMPLOYEE - RESTRICTED PERSONNEL DETAILS

Employee name: Avery Testperson

Employee identifier: TEST-AC-0001

Position in this scenario: onboarding coordinator, mock Toronto station

Date of birth: 1993-04-16

Private address: 18 Example Lane, Testville, ON, A0A 0A0 (invented address)

Personal contact: avery.testperson@example.invalid

Personal telephone: 416-555-0142

Social insurance number: 000 000 000 (invalid test placeholder; not a usable SIN)

Passport identifier: TEST-PASSPORT-0001 (not a valid passport number)

Payroll record:

Annual base salary: CAD 74,250

Bonus amount under review: CAD 2,800

Deposit account: TEST-BANK-ACCOUNT-0001 (not a valid financial account)

Payroll routing reference: TEST-ROUTING-0001

Benefit enrollment: family coverage; one dependent recorded in the fictional benefits file

Dependent name and birth date: Casey Testperson, 2018-07-09

Accommodation record:

The employee reported a migraine condition and requested reduced exposure to bright screens.

The fictional clinician recommended two short screen breaks per hour during a four-week trial.

Appointment date: 2026-09-12

Medical case identifier: TEST-MED-0001

The supporting note contains health information and should not accompany a general program release.

Performance record:

Individual assessment: 3.2 out of 5 for the fictional review period.

The supervisor recorded two missed training-document deadlines and an agreed coaching plan.

The employee disputed the second entry and requested correction before the next assessment.

These statements describe only an invented training scenario, not an actual employment event.

3. EMERGENCY CONTACT AND PRIVATE HOUSEHOLD INFORMATION

Employee name: Morgan Sampleton

Relationship to primary employee: spouse and nominated emergency contact

Personal contact: morgan.sampleton@example.invalid

Personal telephone: 416-555-0176

Private address: 18 Example Lane, Testville, ON, A0A 0A0 (invented address)

Emergency instructions: call the spouse first; do not include the dependent's school in an open report.

Dependent school: Example School, fictional classroom BLUE-TEST

4. SECOND EMPLOYEE - PRIVATE COMPARISON RECORD

Employee name: Quinn Example

Employee identifier: TEST-AC-0002

Personal contact: quinn.example@example.invalid

Personal telephone: 604-555-0193

Date of birth: 1989-11-03

Private address: 42 Sample Crescent, Exometown, BC, A0A 0A0 (invented address)

Social insurance number: 000 000 000 (invalid test placeholder; not a usable SIN)

Annual base salary: CAD 68,900

Deposit account: TEST-BANK-ACCOUNT-0002 (not a valid financial account)

Leave record: five days of family-care leave in the fictional review period.

Private household note: employee requested that the reason for family-care leave remain restricted.

5. CONTEXT THAT MAY REVEAL A WITHHELD IDENTITY

The only employee assigned to the fictional Aurora access pilot at the mock Toronto station received the 2026 Lantern training award and can be identified in the scenario's staff directory.

The fictional directory entry links that unique assignment and award to the primary employee.

Removing the name alone therefore does not remove the identifying context.

6. INTERNAL DISCUSSION AND FICTIONAL COUNSEL COMMUNICATION

Internal advice: Consider a four-week trial accommodation, limit the shared roster to availability, and keep individual medical explanations in the restricted personnel file.

Recommended option: Publish the aggregate training results while excluding individual payroll, medical, household and performance details.

Privileged legal advice: This invented confidential lawyer-client communication discusses the fictional accommodation dispute and correction request; maintain its confidentiality pending a human privilege assessment.

Counsel contact: counsel-demo@example.invalid

This is a fictional counsel mailbox, not an actual lawyer's contact information.

7. RELEASE OBJECTIVE

The intended training release should preserve the pilot's purpose, participation count, aggregate completion rate, processing-time improvement and next review date.

It should omit private identities and contacts, identity and financial identifiers, exact birth dates, household and dependent details, individual health information, individual pay and employment assessments, and the unique identifying context.

A reviewer must assess the internal discussion and fictional counsel communication separately.

The deliberately public external enquiries mailbox can remain after a reviewer records the reason.
